

KARAKUTA
Fresh Farm

Welcome to

We specialize in production and exporting of **farm fresh Herbs** **Vegetables** and **Hass Avocados** under the brand name **Karakuta Fresh Produce**.

Our farm covers 45 hectares and is located in Juja, Kiambu county, Kenya.

With a constant supply of water from our all-weather private dam (picture at back page), we are capable to produce high quality produce all year round.

We are committed to the **Global GAP Guidelines**, responsible sourcing and business integrity code of practice.

Our Processes...

Because we own and operate our farms, we have complete control over the entire process to ensure safety, quality and freshness of all our produce.

Seed Germination

Outdoor Plants

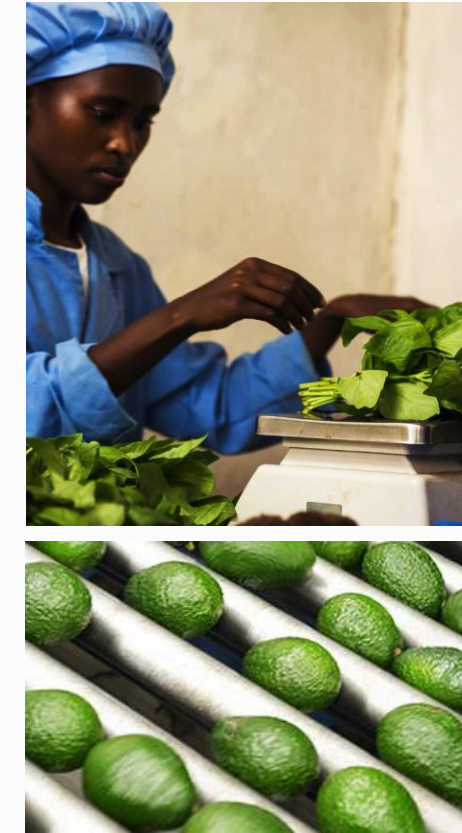

Indoor/
Greenhouse Plants

Close Crop Inspection
and Management

Harvesting

Grading &
Packaging

Dispatch to
airport

Basil

Karakata Sweet Basil oval cupped green leaves are grown in high standard for a crispy bite and an intense and peppery flavor.

Tarragon

Karakuta French Tarragon has a delicately refined flavor of liquorice and mint. The French Tarragon is hand selected and bunched using food grade rubber bands.

Dill

Soft delicate, feathery leaves, with slender delicate stems, an aromatic but mild flavour, similar to caraway, fresh clean, slightly bitter grassy flavor. Also has a strong pungent, characteristic coriander flavour with a hint of citrus, spice and sweetness, Orangey, carrot and earthy.

Mint

We produce deep rich fresh mint with a distinctive aromatic aroma and supply as loose or bunched based on customer's prevalence.

Thyme

The Product has a woody fragrant flavour and a characteristic deep rich fresh distinctive aroma with small green leaves that have a purple underside.

Rosemary

Karakuta high quality Rosemary is grown to have a subtle smoky, slightly bitter flavor.

Coriander

The product is grown in a perfect condition to give it a deep rich fresh distinctive aroma.

Hass Avocado

The Hass Avocado from Karakuta Fresh Produce is a cultivar of avocado with dark green-colored and bumpy skin, weighing 200-300g per fruit.

We have 6,000 trees established in 3 phases. Phase 1 has 3,000 seedlings planted in 2016 while Phase 2 & 3 have 3,000 planted in April & October 2017

SOCIAL RESPONSIBILITY

We understand the need to keep a healthy balance between nature and human activity. That is why we practice sustainable farming techniques with low carbon footprint and offer better employee welfare through;

- Pay a fair wage.
- Use mostly rain water.
- Minimize wastage.
- Practice energy efficient farming

MRL'S

We minimize the use of pesticides and where used, we strictly adheres to the set maximum residue levels (MRLs) for fresh herbs as defined by the European Union and even stricter ones defined by our customers.

STANDARD & QUALITY

All our farms are Global GAP certified. We check the quality of our produce at the farm before dispatch, ensuring we deliver only the best product.

We also work with our clients to ensure that we meet and beat their expectations with respect to quality.

ENVIRONMENTAL CONSERVATION

Karakuta Fresh Farm is a beneficiary of nature. As such, we ensure we play our part in environmental conservation. Using our private dam, we have maintained a good tree cover all around the farm and have an active tree seedlings nursery to encourage our neighboring communities to embrace more tree planting.
